PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in Security Operations Center (SOC) monitoring, SIEM-based threat detection, and incident response. Proficient in log analysis, alert triage, and threat hunting using Splunk. Solid understanding of the MITRE ATT&CK framework, network security protocols, and attacker techniques. Experienced in identifying and reducing false positives and supporting real-time cyber incident investigations.

WORK EXPERIENCE

Cybersecurity Intern | Avenorr Infotech

May 2026 – Present

- Assist in SOC monitoring, log analysis, and alert triage using SIEM tools
- Support incident detection, investigation, and documentation of security events
- Help map threats to MITRE ATT&CK techniques for structured analysis

Networking Intern | Honda | Kerala, India

April 2026 – May 2026 (1 Month)

- Monitored network performance, identified irregularities, and reported potential security incidents to senior IT staff
- Supported firewall configurations and security controls aligned with organizational policies
- Assisted in managing user accounts, permissions, and access controls (IAM)
- Gained hands-on exposure to TCP/IP, DNS, DHCP, and LAN/WAN troubleshooting
- Escalated and documented network and security issues with senior engineers

CERTIFICATIONS & TRAINING

Certified IT Infrastructure & Cyber SOC Analyst (CICSA) – January 2026

Hands-on training in SIEM (Splunk), log correlation, alert triage, incident response, and SOC workflows.

SOC & Threat Hunting Training

Log analysis, threat detection, IOC identification, and proactive threat hunting in simulated SOC environments.

SECURITY PROJECTS

SIEM-Based Threat Detection & Incident Response Lab

- Monitored and analyzed security logs using Splunk SIEM for real-time threat detection and alert investigation
- Performed alert triage and log correlation to detect brute-force attempts, suspicious logins, and anomalies
- Reduced false positives through alert validation and escalated confirmed incidents with SOC documentation

Threat Hunting & Log Analysis

- Conducted proactive threat hunting using IOCs and behavioral log patterns
- Mapped adversary behaviors to MITRE ATT&CK tactics and techniques
- Investigated anomalies in network traffic and endpoint logs

SIEM & XDR Platform Comparative Evaluation

- Compared Microsoft Sentinel, Splunk, Wazuh, Elastic, QRadar, Cortex XDR, Defender XDR, and others
- Created detailed comparison tables and evaluation criteria

SOC Investigation – Web Server Log Analysis

- Investigated Apache access.log, error.log, and auth.log
- Identified suspicious login activity and analyzed web server activity
- Prepared a professional SOC investigation report

Vulnerability Management Audit – Mutillidae

- Performed Nmap service enumeration
- Conducted Nessus vulnerability assessment
- Assessed risks using CVSS
- Created remediation plans and a comprehensive audit report

Phishing Email Investigation

- Analyzed a phishing .eml file
- Examined email headers, sender details, Reply-To, and Return-Path
- Identified phishing indicators and IOCs, and recommended mitigations

Network Traffic Analysis – Replay Attack

- Analyzed packet captures using Wireshark
- Identified replay attack behavior
- Produced an investigation report with findings and recommendations

Web Application Security Assessment

- Researched HTTP security headers (CSP, X-Frame-Options, X-Content-Type-Options)
- Reviewed cookie security configurations (Secure, HttpOnly, SameSite)
- Documented web application security best practices and hardening recommendations

Research on Alternative Network Analysis Tools

- Compared Wireshark with other network monitoring and packet analysis tools

TECHNICAL SKILLS

Security Operations: SOC Monitoring, Alert Triage, Incident Response, Threat Detection, Threat Hunting, Log Analysis

SIEM & Tools: Splunk (Search, Dashboards, Alerts), Wireshark, Nmap, Burp Suite, Netcat

Threat Analysis: IOC Analysis, Log Correlation, MITRE ATT&CK Mapping, Anomaly Detection

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, Firewall Logs, LAN/WAN, Network Protocol Analysis

Operating Systems: Windows Event Logs, Linux (Ubuntu, Kali Linux)

Scripting: Python (Automation), Bash Scripting

Security Concepts: Incident Management, Vulnerability Management, Cyber Kill Chain, Defense-in-Depth

EDUCATION

B.Tech in Computer Science and Engineering

PRIST University, Tamil Nadu, India | Graduated: September 2025 | CGPA: 6.98 (First Class)

KEY ACHIEVEMENTS

- Performed real-time log monitoring and alert investigation using Splunk SIEM in a simulated SOC environment
- Identified and analyzed simulated cyber incidents including brute-force and suspicious login attempts
- Reduced false positives through alert validation and advanced log correlation techniques
- Applied the MITRE ATT&CK framework to analyze attacker TTPs
- Conducted proactive threat hunting across endpoint and network logs
- Demonstrated proficiency across the full SOC workflow: detection, triage, investigation, escalation, documentation

PERSONAL INFORMATION

Nationality: Indian

Languages: English, Hindi, Malayalam, Tamil (Fluent), Arabic (Basic)

Availability: Immediately available
